**Subject:** Microsoft Settlement

TO: DOJ  
FROM: JOHN GIBSON

To whom it may concern,

I believe that the settlement should only require price gouging and fair competition be available to all parties. I also think that Microsoft earned their success and should not be denied their own success. Our country is in a recession and hampering the success of Microsoft was the beginning. Microsoft is a technology. Technology is a media for others and a form to communicate one's idea's and share interests. Since it's foundation that has been true, I believe that there should be a board to overlook the practices of Microsoft periodically and those people that do so should be of high integrity.

I trust our department of justice to make the decisions that will be in the best interest of this country and look forward to your decision.

Sincerely,

John Brian Gibson
